Course Development Activities

1. Co-developed Introduction to Engineering and Introduction to Computing courses for the student laptop pilot program at U. of Oklahoma (1996-1997).
2. Co-PI and geotechnical coordinator for the Sooner City design-throughout-the-CE curriculum at U. of Oklahoma. Sooner City was a multi-year grant from NSF to integrate a shared design theme throughout all civil engineering courses (1997-2000). Led the integration of multimedia and design elements into geotechnical courses. The Sooner City team received 2 education awards.
3. Introduced multidisciplinary (civil, electrical, mechanical) project into the CE Senior Capstone Design at U. of Oklahoma (2001).
4. Developed Foundation Engineering (EGGN 464) into design project-driven course. Two-thirds of the course is driven by team design of a foundation and retaining wall system for a project under construction or recently constructed in the Denver metro area (2003-2006).
5. Led the development of a \$40k tech fee proposal for Soil Mechanics lab at CSM to modernize lab with student-friendly consolidation, triaxial and axial compression equipment. Introduced two new labs to reflect modern practice: (1) mechanically stabilized earth wall construction; (2) field testing with light weight deflectometer and dynamic cone penetrometer (2006-2007).

6. Led development of campus-wide IGERT graduate education program in intelligent geosystems. Co-developed a new course on Intelligent Geosystems (SYGN 550), assisted in formal leadership/teamwork development program, and assisted in formation of social/environmental ethics & policy Ph.D. minor (2006-present).
7. Serve as Acting Director to create multi-disciplinary Center for Underground Construction & Tunneling. Working with colleagues in Civil, Geological and Mining Engineering, we are building undergraduate and graduate education programs as well as growing research efforts to become a distinguished international center of excellence in this field.
8. Developed two new courses: Earth Retaining Structures/Support of Excavations (CEEN 520) and Analysis & Design of Tunnels in Soft Ground (CEEN 523) (2012-present).
