

COLORADO

Department of Public
Health & Environment

Dedicated to protecting and improving the health and environment of the people of Colorado

Presentation Title: *Why the Frac Should We Waste It?*

Presenters: David Snapp and David Kreutzer

Biography

David Snapp has been an industrial recycling and composting specialist at the Colorado Department of Public Health and Environment for 8 years and currently manages the Materials Management Unit which includes the waste tire, waste grease, recycling, beneficial use and product stewardship programs. David is leading a compost facility regulation revision and has developed the solid waste program's beneficial use criteria over the last 8 years. David received a Bachelor's of Science in Environmental Management from Indiana University in 2002.
