

ELECTRIC VEHICLE CHARGING STATION

Parking Services is aimed at encouraging the use of fuel efficient vehicles on the Mines' campus. CSM has received grant money from the Regional Air Quality Council and installed four, level 2, electric vehicle charging stations throughout campus, which will be able to charge 6 vehicles at a time. These charging stations can be found in Lots E, CTLM, and F.

Use of the electricity is free, however, those who use the charging stations will need to have a campus permit for the specified lot or visitors/public will need to purchase an hourly permit from our pay and display parking meters.

There is a 4-hour time limit at each station. It is a violation to be parked in an EV charging station without actively charging a hybrid/electric vehicle.
