

Graduate Fellowships Panel, August 31, 1-2pm, Ballrooms D+E, Student Center

The Office of Research and Technology Transfer is holding a panel discussion to help graduate students develop competitive graduate fellowship proposals. We will particularly focus on the Graduate Research Fellowship Program (GRFP) sponsored by the National Science Foundation. <https://www.nsfgrfp.org>

The session will include insights from several successful Mines GRFP fellows, PIs of fellows, and faculty who have served on review panels.

GRFP fellowships provide a \$34,000 annual stipend for three years to catalyze professional development and independent research. https://www.nsfgrfp.org/general_resources/about

GRFP proposals are due in late October (varying by discipline):

Additional important information can be found at <http://www.alexhunterlang.com/nsf-fellowship>.

Many other sponsors provide graduate student fellowships, including

- NASA <https://www.nasa.gov/education/fellowships-scholarships/index.html>
- Department of Defense <https://ndsegfellowships.org>
- National Institutes of Health <https://researchtraining.nih.gov/career/graduate>
- Department of Energy <https://science.energy.gov/wdts/scgf/>
