## Chronological Index

### Volume 1 (1906-07)
1. Commencement address: How to succeed (Richards)
2. Cooperation between the State Mining Bureau and the State School of Mines (Alderson)
3. Dedication of Simon Guggenheim Hall

### Volume 2 (1907-08)
1. Commencement address: The engineer and the age (Shephard)
2. Early history of the Colorado School of Mines (Smith)
3. Some minerals recently received by the Colorado School of Mines (Patton)
4. Geological field work at the Colorado School of Mines (Smith)

### Volume 3 (1908-09)
1. Commencement address: The worth of an engineer (Walsh)
2. Catalog edition, 1908-1910
3. Rare metals: Uranium and vanadium (Fleck)
4. Tungsten in Colorado (Van Wagenen)

### Volume 4 (1909-1910)
1. Commencement address, South Dakota School of Mines: Artist or artisan—which? (Alderson)
2. The mining profession (Hammond)
3. Preliminary report of the radioactivity of the carnitite of southwest Colorado (Fleck & Haldane)
4. Book of views

### Volume 5 (1910-1911)
1. Radium and radioactivity (Miller)
2. Commencement address: The engineer of the future (Blow)

### Volume 6 (1911-12)
1. An extension of the Dewey system of classification as applied to metallurgy and metallography and assaying (Keeney)
2. Commencement address: Constitutional basis of citizenship in the United States (Slocum)
3. Scope and progress of the mining industry in Colorado (CSM Faculty)

### Volume 7 (1912-13)
1. Book of views
2. The experimental ore dressing and metallurgical plant of the Colorado School of Mines (Alderson)
3. An extension of the Dewey system of classification as applied to mining (Allen)

### Volume 8 (1913-1914)
1. Some recent developments at Leadville (Butler)
2. Commencement address: Principles more important than practice in technical education (Douglas)
3. Physiography of Golden and vicinity and its relation to the geologic structure (Schneider)
4. Book of views

### Volume 9 (1914-1915)
2. Commencement address: Professional ethics (Raymond)
3. Electrosopes and methods of radioactive measurements (Miller)
4. Preliminary report of the Cresson gold strike at Cripple Creek, Colorado (Patton & Wolf)
The cyanide industry, its present status and future (Traphagen & Bailar)

Volume 10 (1915)
1 Book of views
2 Commencement address: Epochs in science (Blake)
3 The forty-second annual opening, address by Gov. G. A. Carlson
   The potash deposits of the Sand Hills region of northwestern Nebraska (Ziegler)
   Systems of heat distribution (Hawley)
   Address on the rare metals—tungsten (Fleck)
   The cost of power in isolated plants (Hawley)
   Oil flotation at the Colorado School of Mines (Traphagen)
   The mineral resources of Texas (Ziegler)
4 The Colorado Workmen’s Compensation Act (Williams)
   Safety and conservation in life insurance (Hodnette)
   The insurance angle of our Workmen’s Compensation Act (Cleveland)
   The interpretation and use of financial reports (Storms)

Volume 11 (1916)
1 Catalog edition, 1917
2 Flotation experiments (Wright)
3 Commencement address: The problem of efficiency (Finlay)
   Notes on the survey of a large tract of land (Chedsey)
   Geological sections in the vicinity of Golden (Ehnbom)
   A study of the compressor indicator diagram (Lucht)
   Heat loss through buildings and building materials (Hawley)
   A treatise on molybdenum (Fleck)
4 Tube milling coke (Young)
   The spectroscope and spectroscopic quantitative analysis (Miller)
   The civic duties and opportunities of the engineer (Parmalee)

Volume 12 (1917)
1 Catalog edition, 1917
2 Foothills structure in northern Colorado (Ziegler)
3 The experimental ore dressing and metallurgical plant of the Colorado School of Mines (Alderson)
4 Book of views

Volume 13 (1918)
1 Catalog edition, 1918
2 The oil shale industry (Alderson)
3 Common methods of determining latitude and azimuth useful to engineers and surveyors (Wolf)
4 Colorado’s future as an oil producer (Ziegler)

Volume 14 (1919)
1 Catalog edition, 1919
2 Book of views
3 The Cripple Creek district of Colorado, a resurvey, Colorado School of Mines (Alderson et al.)
   The composition of oil shale and shale oil (Botkin)
   The production of shale oil (Williams)

Volume 15 (1920)
1 Catalog edition, 1920
2 The refining of crude petroleum (Low)
   Shale oil and its refining (Low)
   Some observations relative to shale oil (Low)
3 Book of views
4 The oil shale industry in Scotland and England (Alderson)
   Directory of Scottish and English oil-shale retorts (Alderson)
4 Supp.
   A directory of oil-shale retorts (Alderson)
   Supplementary bibliography of publications on oil shale (Alderson)

Volume 16 (1921)
1 Catalog edition, 1921
2 The present status of the oil shale industry, 1921 (Alderson)
   The Colorado School of Mines method for the distillation of oil shale (Low)
   A study of the saturated and unsaturated compounds of shale oils (Botkin)
   Oil-shale industry—selected bibliography (Alderson)
3 Commencement address: The twentieth century engineer (Laist)
4 A symposium of studies and researches in the oil-shale industry (Franks, Bacca & Hackett)
   Oil shale bibliography of recent articles (Alderson)
4 Supp.
   American Mining Congress, Chicago, Oct. 17-21, 1921, National Oil Shale Conference, Oct. 18, 1921
   Recent world wide progress in oil-shale development (Alderson)
   Address: Oil shale (Barnwell)
   Some notes on the production of oil from shale (Skinner)
   Oil shales (Ede)

Volume 17 (1922)
1 Catalog edition, 1922
1 Supp.
   Book of views
2 The education of a mining engineer (Alderson)
3 Commercial oil shale—what is it? (Alderson)
   Esthonian prizes for oil shale furnaces (Alderson)
   Oil-shale bibliography, July 1922 (Alderson)
4 Oil shale of Kentucky (Alderson)
Oil shale in Russia (Alderson)

4 Supp. A
Preliminary study of the organic matter of Colorado oil shales (Franks & Goodier)

4 Supp. B
American Mining Congress, Cleveland, Ohio, Oct. 9-14, 1922
Paper presented "Mining of oil shales" (Russell)

Volume 18 (1923)
1 Catalog edition, 1923-25
1 Supp. A
A dissertation...chemical examination of the organic matter in oil shales (McKee & Goodwin)
1 Supp. B
Oil-shale—a résumé for 1922 (Alderson)
Oil-shale bibliography for 1922 (Alderson)
2 The education of a mining engineer (Alderson)
3 The destructive distillation of oil shale: A thesis (Stewart & Trenchard)
4 National oil-shale conference, in connection with the American Mining Congress, Milwaukee, Wis., Sept. 24-29, 1923

Volume 19 (1924)
1 The oil shale industry: A résumé for 1923 (Alderson)
1 Supp.
Book of views
2 Investigation of oil shale kerogen by the fractionation of the primary bitumen in high vacuum and by organic extractions (Blackburn)
3 The Trumble Oil Shale Cycle Distillation Plant (Alderson)
4 National Oil-Shale Conference, Sacramento, Calif. (Alderson)

Volume 20 (1925)
1 Catalog edition, 1925-27
1 Supp. A
The oil-shale industry: A résumé for 1924 (Alderson)
1 Supp. B
Distillation of New Albany oil shales (Hoberger & Shipman)
1 Supp. C
Book of views
2 Colorado oil shale (Alderson)
3 The geology of the Golden area, Colorado (Johnson)
4 Bibliography of Colorado maps (Johnson)

Volume 21 (1926)
1 Catalog edition, 1926-27
2 The trend of flotation (Weimg & Palmer)
3 Bibliography of the geology and related subjects of northwestern Colorado (Revised) (Johnson)
4 Building conditions at the Colorado state institutions of higher learning (Crosman)
4 Supp. A
Maintenance conditions at the Colorado state institutions of higher learning (Crosman)

Volume 22 (1927)
1 Catalog edition, 1927-28
1 Supp. A
Book of views
2 Petroleum, a selected bibliography (Hoyt)
3 Commencement address: Mining and civilization (Rickard)
3 Supp. A
Summer session, 1927
4 Bibliography of the geology of north central Colorado (Johnson)

Volume 23 (1928)
1 The electrodeposition of zinc from ammoniacal carbonate solutions (Campbell)
1 Supp. A
Summer session, 1928
2 The trend of flotation (second edition, revised) (Weimg & Palmer)
3 Index of publications of the Colorado School of Mines (Budd)
3 Supp. A
Studies in Colorado coals (Carpenter & Manuel)
4 Bibliography of the geology of south central Colorado (Johnson)

Volume 24 (1929)
1 Geophysical methods of prospecting, principles and recent successes (Heiland)
2 Catalog edition, 1929-30
2 Supp. A
Summer session, 1929
3 Book of views
4 The trend of flotation (third edition, revised) (Weimg & Palmer)

Volume 25 (1930)
1 Catalog edition, 1930-31
1 Supp. A
Summer session, 1930
2 The Experimental Mine (Read & Underhill)
2 Supp. A
The Department of Geophysics
3 Geology of the Golden area (second edition, revised) (Johnson)
4 The physical properties of manganese sulfide with relation to its effects in steel (Krekel)

Volume 26 (1931)
1 Summer session, 1931
1 Supp. A
The Department of Geophysics (second edition, revised)
2 The application of a gasometric method for the determination of oxygen in coals (Dumke)
3 A selected list of books and references on geophysical prospecting (Heiland & Wantland)
4 Beryllium, a bibliography (Hoyt & von den Steinen)

**Volume 27 (1932)**
1 Catalog edition, 1932-33
2 Supp. A
   - Book of views
2 Summer session, 1932
3 Announcement of the series of publications of the Department of Geophysics (Heiland)
   - A study for the development of a field magnetometer based on the principle of the earth inductor (Aguerrevere)
   - A magnetic survey of the Ralston Dike, Jefferson County, Colorado (Levings)
   - Study of an adjustable wave-filter suitable for the reception of reflected seismic waves (Pirson)
4 Petroleum, a selected bibliography (second edition, revised) (Hoyt)

**Volume 28 (1933)**
1 Catalog edition, 1933-35
2 Summer session, 1933
3 A functional size-analysis of ore grinds (Weinig)
4 Elements of geophysical prospecting (Heiland)

**Volume 29 (1934)**
1 Catalog edition, 1934-35
2 Summer session bulletin, 1934
3 Mines views
4 Introduction to the geology of the Golden area (Johnson)

**Volume 30 (1935)**
1 Geology and petroleum field courses
2 Summer session bulletin, 1935
2 Supp.
   - Field courses in summer (pamphlet)
3 Catalog edition, 1935-36
4 The Experimental Mine

**Volume 31 (1936)**
1 Mines views
2 Summer session bulletin, 1936
2 Supp.
   - Field courses
3 Catalog edition, 1936-37
4 Index to Colorado School of Mines publications (Budd & Braden)

**Volume 32 (1937)**
1 Geophysical studies, 1932-1936 (Heiland, Wantland & Aldredge)
2 Summer session bulletin, 1937
3 Bibliography and index of the mines, mining companies and mills, Gilpin County, Colorado (Hoyt)
4 The trend of flotation (fourth edition, revised) (Weinig & Carpenter)

**Volume 33 (1938)**
1 Catalog edition, 1938-39
2 Summer session bulletin, 1938
3 Guide to the geology of the Golden area (fourth edition, revised) (Van Tuyl et al.)
4 Report of biennial period July 1, 1936 to June 30, 1938

**Volume 34 (1939)**
1 Catalog edition, 1939-40
2 Summer session bulletin, 1939
2 Supp.
   - Book of views
3 The Table Mountain lavas and associated igneous rocks near Golden, Colorado (Waldschmidt)
4 A preliminary study of basic open-hearth slag characteristics and the correlation between them and the corresponding baths (Reed)

**Volume 35 (1940)**
1 Catalog edition, 1940-41
2 Summer session bulletin, 1940
3 Some factors that affect the marketing of petroleum products and an investigation of the effect of railroad tariffs upon marketing areas (Chinn)
4 Powder metallurgy, a review of its literature (Carpenter)
4 Supp. A
   - Biennial report of the Colorado School of Mines, July 1, 1938 to June 30, 1940

**Volume 36 (1941)**
1 Small foraminifera from the Late Tertiary of the Nederlands East Indies (LeRoy)
2 Supp. A
   - Catalog edition, 1941-42
2 The time of origin and accumulation of petroleum (Van Tuyl & Parker)
2 Supp.
   - Summer session bulletin, 1941
2 Supp. C
   - Facilities for graduate work in geology at the Colorado School of Mines
2 Supp. D
   - Geophysical exploration at the Colorado School of Mines
3 Mine-timber studies
   - Stresses in mine-drift timber-sets (Grazier)
   - Increasing the endurance of drift-sets (Gayer)
4 Powder metallurgy, a review of its literature (revised edition) (Carpenter)

**Volume 37 (1942)**
1 Geophysics in war (Heiland)
2 Supp. A
   - Catalog edition, 1942-43
2 The oil and gas industry of Colorado (Barb)
2 Supp. B
   - Summer session bulletin, 1942
3 Contributions in geology—1942
Fedorow method (universal-stage) of indicatrix orientation (Haff)
The beryl-monazite pegmatite dike of Centennial Cone, Colorado (Waldschmidt & Adams)
Petrology applied to aggregates for concrete (Haff)
4 The occurrence and production of molybdenum (Vanderwilt)

**Volume 38 (1943)**
1 Geologic importance of calcareous algae with annotated bibliography (Johnson)
Supp. A
Report of biennial period July 1, 1940 to June 30, 1942
2 Index to publications, Colorado School of Mines
3 Review of petroleum geology in 1942 (Van Tuyl et al.)
4 The occurrence and production of vanadium (Argall)
Supp. B
Announcement of the accelerated program, 1943-44

**Volume 39 (1944)**
1 Hydrocarbons of the Uinta Basin of Utah and Colorado (Barb & Ball)
Review of geology and field work (Barb)
Survey of bitumen analyses and extraction methods (Ball)
Supp. A
General catalog issue, 1944-45
2 Review of petroleum geology in 1943 (Van Tuyl et al.)
3 Miocene foraminifera from Sumatra and Java, Netherlands East Indies, Parts I & II (LeRoy)
4 Aerogeology in mineral exploration (Levings)

**Volume 40 (1945)**
1 The migration and accumulation of petroleum and natural gas (Van Tuyl, Parker & Skeeters)
Supp. A
Summer session bulletin, 1945
Supp. B
General catalog issue, 1946-47
Supp. C
Biennial report, 1942-44
2 Review of petroleum geology in 1944 (Van Tuyl et al.)
3 A résumé of the Paleozoic stratigraphy of Colorado (Johnson)
4 Publications on work done by U.S.G.S. in cooperation with the State of Colorado (Crain)

**Volume 41 (1946)**
1 Selected well logs of Colorado (Barb)
Supp. A
Summer session bulletin, 1946
2 Stratigraphy of the Golden-Morrison area, Jefferson County, Colorado (LeRoy)
3 Review of petroleum geology in 1945 (Van Tuyl et al.)
4 The vermiculites and their utilization (Goldstein)

**Volume 42 (1947)**
1 Mine-dust control (Signer, Yurdakos & Sarp)
Supp. A
General catalog issue, 1947-48
Supp. A
General catalog issue, 1947-48 (revised)
Supp. B
Biennial report, 1944-46
Supp. C
Summer session bulletin, 1947
2 Temper brittleness in boiler steels and rail steels (Holtman & Keil)
3 Review of petroleum geology in 1946 (Van Tuyl et al.)
4 Cooperative work by U.S. Geological Survey and State of Colorado (Crain)

**Volume 43 (1948)**
1 Heavy-density separation—a review of its literature (Hyer)
Supp. A
General catalog issue, 1948-49
Supp. B
Summer session bulletin, 1948
2 Guide to the geology of central Colorado (Vanderwilt et al.)
3 Review of petroleum geology in 1947 (Van Tuyl et al.)
4 The nature and origin of limestone porosity (Hohlt)

**Volume 44 (1949)**
1 The behaviour of rocks and rock masses in relation to military geology (McCutchten)
Supp. A
General catalog issue, 1949-50
Supp. B
Summer session bulletin, 1949
Supp. C
Biennial report, 1946-48
2 Industrial minerals of Colorado (Argall)
3 Subsurface geologic methods (LeRoy & Crain)
4 An introduction to the study of organic limestones (Johnson)

**Volume 45 (1950)**
Supp. A
Seventy-fifth anniversary of the Colorado School of Mines: A record of the proceedings
Supp. B
General catalog issue, 1950-51
Supp. C
Summer session bulletin, 1950
1A Economics of the mineral industry (Crain)
Mineral resource appraisal by the U.S. Geological Survey (Lasky)
Oil and human welfare (Ball)
Gold, our most strategic mineral (McLaughlin)

1B
- Applied geology (Van Tuyl & Kuhn)
- The petroleum geology of Colorado (Dobbin)
- Modern methods in petroleum exploration (Kaufmann)
- Applications of geology to the investigation of our water resources (Sayre)
- Applications of geology in soil conservation (Griswold)
- Geology and irrigation engineering (Dirmeyer)
- Applications of geology to highway engineering (Horner & McNeal)
- A tribute to the early workers in Colorado geology (Butler)
- Problems in the relation of ore deposits to hydrothermal alteration (Schwartz)
- The fumarolic-hot spring and “epithermal” mineral deposit environment (Schmitt)
- The geochemistry of argillic and related types of rock alteration (Lovering)
- Interpretation of wall-rock alteration at Butte, Montana (Sales & Meyer)
- Discussion of alteration and its applications to ore search: Metasomatic alteration along veins (Butler)
- Problems of wall-rock alteration in shallow volcanic environments (Burbank)
- Discussion of alteration and its application to ore search (Kerr)

2A
- Petroleum Refining (Crain)
  - The cracking of petroleum (Isom)
  - The commercial dehydrogenation of normal butane (Hays & Dolezal)
  - Ethylene production by thermal cracking of propane-ethane mixtures (Buell & Weber)
  - Petroleum refining instrumentation (Schmitt)
  - Research in the petroleum industry—today and tomorrow (Viland)
  - Low-temperature distillation assays of representative western U.S. and Alaska coals (Parry, Goodman & Gomez)

2B
- Coal and metal mining (Crain)
  - Coal Mining
  - Opportunity in the field of coal mining engineering (Woods)
  - Mechanization of western coal mines (Cassano)
  - Economics and technique of strip coal mining (Koenig)
  - Trends of continuous coal mining underground (Wearly)
  - Up-grading Missouri Basin coals by flash drying (Parry & Wagner)
  - Coal and its future (Charles)
  - Synthetic oil from coal (Doherty)
  - Metal Mining
  - A review of progress in the ventilation of the mines of the Butte, Montana, district (Richardson)
  - Safety in the mining industry (Harrington)
  - Transportation of ore underground (McWhorter)
  - Mine valuation (Dismant)
  - Seventy-five years of rock-drill progress (McCormack)
  - Explosives in the mining industry (East)
  - Short-interval-delay blasting in underground operations (Barker)
  - Mining practice at the Climax Molybdenum Mine (McClothin)

3A
- Metallurgy (Crain)
  - The trend of iron-ore concentration in the Lake Superior district (Bitzer)
  - Utilization of fuels (Lesher)
  - Current research in physical metallurgy (Parker)
  - Metallurgical materials in the coal-mining industry (Thomas)

3B
- Petroleum Engineering (Crain)
  - Gas-condensate fields (Brown)
  - The valuation of oil properties for secondary recovery (Earlougher)
  - Secondary recovery of petroleum (Torrey)
  - Petroleum conservation and conservation laws (Carter)

4A
- Geophysics (Crain)
  - The relationship of research and field operations in seismic explorations (Green)
  - Geological imagination in the interpretation of geophysical data (Coffin)
  - Current trends and progress in mining geophysics (Lundberg)
  - Recent developments in electrical logging and auxiliary methods (Doll & Martin)

4B
- Industrial Minerals (Crain)
  - Industrial minerals of Colorado (Argall)
  - The consumption of balls in wet ball milling (Knight & Dyrenforth)
  - Ground water in Nevada (Robinson)
  - Searles Lake development (Dyer)

Volume 46 (1951)
- Supp. A
  - General catalog issue, 1951-52
- Supp. B
  - Biennial report, 1948-50
- Supp. C
  - Summer session bulletin, 1951
- 1
  - An introduction to the design of underground openings for defense (Livingston)
  - Protective standards for underground defense (Leavey)
  - The mechanics of rock failure (Cogan)
  - A review of rock pressure problems (Shoemaker)
  - A method for the determination of stresses around an opening under impact loads (Hesselbacher)
Rock tunneling for underground protective construction (Jones)
Heating, ventilating and air conditioning of underground installations (Rice)
2 An introduction to the study of organic limestones (revised edition) (Johnson)
3 Late Cenozoic erosional history of the Raton Mesa region (Levings)
4 Examination of well cuttings (Low)

Volume 47 (1952)
1 Metallurgical research in uranium, manganese, and nodular cast irons (Goodwin)
   Spectrographic analysis of carnotite ores for their U, O content (Warfield)
   A process for the recovery of manganese from ores (Hendrickson)
   An investigation of the effect of heat treatment upon the hardness, microstructure and combined carbon content of some nodular cast irons (Barnett)

Supp. A
   Book of information, 1952-53

Supp. B
   Courses of instruction, 1952-53

Supp. C
   Summer session bulletin, 1952

2 Studies of organic limestones and limestone-building organisms (Johnson)
   The shell structure of the modern mollusks (Mackay)
   Ordovician rock-building algae (Johnson)
   Organic limestones of the middle and lower Pennsylvanian of Kansas (Lebsack)
   Pennsylvanian reef limestone, Terry County, Texas (Elliott & Kim)

3 Removal of sulfur from petroleum coke
   A study of the methods of removing of sulfur from petroleum coke (Sabott)
   Removal of sulfur from petroleum coke by pyrolosis (Schafer)

4 Wavefront charts and raypath plotters (Musgrave)

Volume 48 (1953)
1 Graphite formation in ductile cast irons
   Formation of nodular graphite in cast irons (Altekar)
   Production of nodular iron with calcium (Araujo)

Supp. A
   Book of information, 1953-54

Supp. B
   Courses of instruction, 1953-54

Supp. C
   Summer sessions bulletin, 1953

2 A study of asphalts and asphaltic materials (LeMaire)

3 A review of the geology and activities in the Uinta Basin (Current)

4 Geology of the Thomasville-Woods Lake area, Eagle and Pitkin Counties, Colorado (Mackay)

Supp. D
   Index to publications, Colorado School of Mines (Goodwin)

Volume 49 (1954)
1 Geology of the Golden-Green Mountain area, Jefferson County, Colorado (Reichert)
2 An introduction to the study of rock building algae and algal limestones (Johnson)
3 Potentiometric-model study of edge-water encroachment (Mason)
4 Study of physical properties in the refining of petroleum (LeMaire)

Volume 50 (1955)
1 Classification of rocks (Travis)
2 Effect of fine particle sizes on sulfide flotation (Wichmann & Bhappu)
3 Engineering geology: Historical development, scope and utilization (Kiersch)
4 Seismic wave propagation and pressure measurements near explosions (Pickett)

Volume 51 (1956)
1 Instrumentation and methods for radioactivity detection in the mineral industry
   Instrumentation for radioactivity detection, Part I (Milmoe)
   Outline of radioactive prospecting methods, Part II (Kanizay)
2 Bibliography of theses on mining in U.S. institutions, Part I (Hartman)
   Longwall mining of oil shale, Part II (Waltch & Rausch)
3 Symposium on Rock Mechanics. Papers and discussion from the First Annual Symposium on Rock Mechanics
   Fundamental concepts of rock failure (Livingston)
   Some views and trends in mining research (Reed)
   A note concerning the mechanism of artificial and natural hydraulic fracture systems (Odé)
   A report on the strata-control research program of the School of Mines, Durham, England (Banister)
   Mine stabilization opening by stress redistribution (Reed)
   Horizontal support of mine openings (van Poollen)
   Fundamental considerations in block caving (Bucky)
   Concrete for ground support in the Kelley Mine (Hannifan)
   Basic performance properties of blasting explosives (Brown)
   Fragmentation of rock through blasting (Hino)
   Blasting experiments in granite rock (Noren)
4 Studies of Mississippian algae (Johnson & Konishi)

Index to publications, Colorado School of Mines (Goodwin)
**Volume 52 (1957)**

1. Waxes and wax-like materials (LeMaire)
2. Bibliography of fossil algae: 1942-55 (Johnson)
3. Behavior of materials in the earth’s crust. Papers and discussion from the Second Annual Symposium on Rock Mechanics
   - Behavior of materials and theories of failure (Silverman)
   - Theoretical and experimental stress analysis (Philippe & Mellinger)
   - Rock properties and the mechanics of subsidence (Rellensmann)
   - Deformation in the Cordilleran Region of western United States (Wisser)
   - Experimental deformation of rocks and minerals (Handin)
   - Petrofabrics in structural geology (Knopf)
   - Theories of hydraulic fracturing (van Poollen)
   - Measurement of residual stress by the strain relief method (Olsen)
   - Instrumentation experiments in mines (Bernatis)
   - Cementation in strengthening rock (Grosvenor)
4. Selected studies of Colorado pegmatites and sillimanite deposits (Heinrich & Bever)

**Volume 53 (1958)**

1. Bibliography of graduate theses on geophysics in U.S. and Canadian institutions (Tarbox)
2. Studies of Devonian algae (Johnson & Konishi)
3. An annotated bibliography on coal (Yingst)
4. A study of structures of molecular complexes found in heavy petroleum fractions (LeMaire)

**Volume 54 (1959)**

1. Studies of Silurian (Gotlandian) algae (Johnson, Konishi & Bezaik)
2. Studies of ice excavation (Rausch)
   - Influence of stress rate and other factors on the strength and elastic properties of rocks (Wuerker)
   - Studies of the energy requirements for crushing (Zeleny & Piret)
   - Correlation for certain Canadian rocks of crushing index values with underground rock failure (Djingheusian & Twidale)
   - The role of stress waves in comminution (Rinehart)
   - The work index in blasting (Bond & Whitney)
   - Application of the principles of soil mechanics to open pit mining (Wilson)
   - The European approach to slope stability problems (Muller)
   - Time dependent deformation and failure of geologic materials (Hardy)
   - The mechanics of rock failure (Robinson)
   - Energy released in rockbursts (Coates)
   - Buildings on expansive clay (Means)
   - The role of effective stress in the behavior of expansive soils (Lambe & Whitman)
   - Modern practices used in the design of foundations for structures on expansive soils (Dawson)
   - Expansive clays—properties and problems (Holtz)
   - The relation of laboratory testing to design for pavements and structures on expansive soils (McDowell)

**Volume 55 (1960)**

1. Petrology of the Fountain and Lyons formations, Front Range, Colorado (Hubert)
2. Mineral economics and the problem of equitable taxation (Lentz)
3. Paleozoic Solenoporaceae and related red algae (Johnson)
4. On fractures caused by explosions and impacts (Rinehart)

**Volume 56 (1961)**

1. Drilling and Blasting Symposium. Papers and discussion from the Tenth Annual Drilling and Blasting Symposium
   - Drag bits and machines (Goodrich)
   - Laboratory rotary rock bits (Medlock)
   - Efforts to develop improved oil well drilling methods (Ledgerwood)
   - Rotary percussion air hammer drilling (Liljestrand)
   - Higher air pressures for bottom-hole percussion drills (Pfeifer & Lacabanne)
   - The “Galis” rotary percussion roof drilling machine (Pyles)
   - Drilling and drill steel progress at the Idarado Mining Company (Koenan)
   - Recent developments and trends in production blast-hole drilling on the Mesabi Range (Nelson)
   - Drilling beneath the ocean (Bascom)
The effects of coupling on explosive performance (Atchison)
Application of the Livingston Theory (Bauer)
Particle characteristics of ammonium nitrate and blasting agent performance (Clark et al.)
Ammonium nitrate slurry blasting agents (Cook)
Fracturing of rock salt by a contained high explosive (Short)
New drilling and blasting techniques for deeper drift rounds (Lautmann)
Theory and practice of inclined drilling for surface mining (Kochanowsky)
Drill pattern and initiation-timing relationships for multiple-hole blasting (Ash)

2 Studies of Ordovician algae (Johnson & Høeg)

3 Fiftieth anniversary of froth flotation in the U.S.A.
Future flotation research (McGlashan)
Froth flotation of ion-exchange resins and its application to practice (Bhappu)
New developments and the future of flotation in Italy (Usoni)
Measurement of zeta potentials by radial streaming method (Street & Stewart)
An investigation of the mechanism of selective salt flotation and discussion of underlying theories (Singewald)
Hydrolytic and ion pair adsorption models for collectors in flotation (Cook)
Aspects of flotation cell design (Jowett & West)
The analysis of flotation test data (Dell)
The evaluation of flotation performance (Dell)
Dezincing of lead concentrates at the Sullivan Concentrator (Chalmers)
Recent research and development in flotation of oxidized ore of copper, lead and zinc (Rey et al.)
Extraction of molybdenite from copper flotation products (Hernlund)
New facets in flotation at Climax (Cuthbertson)
Flotation’s early years (Pryor)
Flotation aids cyanidation of Pachuca ores (Bryan)
The leach-precipitation flotation method of concentration at Miami Copper Co. (Bean)
Design of flotation section (Walvoord)
Frothing characteristics of alcohol solutions (Kuno)
Attritioning and conditioning in flotation of spodumene ore (Arbiter, Abshire & Crawford)
Present flotation practice in the coal industry in Great Britain (Lewis)
Phosphate flotation (LeBaron)
Anionic vs. cationic flotation of potash (Clark & Reiter)
Mechanics and control in coal flotation (Bearce)
Iron ore flotation (Erck)
The development of flotation for the treatment of lead-silver-zinc ores at Broken Hill, New South Wales, Australia (Read, Thomas & Parsons)
Microscopy applied to mineral dressing (Amstutz)
Technical efficiency of concentration operations (Stevens & Collins)
Development of the treatment by flotation of the ore of the Sullivan Mines (Diamond)
Analysis on the flotation performance of iron ores (Chi)
Condensed sodium phosphates in ore beneficiation (Lyons & Languth)
A method for predicting flotation concentrate quality (Horst & Mitchell)
Amine flotation of Pennsylvania white residual clay (Sun, Cohen & Argyle)

4 The mineral industries of Japan and southeast Asia (Oiwa, Nordquist & Lentz)

Volume 57 (1962)

1 The algal genus Lithothamnium and its fossil representatives (Johnson)
2 Geophysical well logging: The application of geophysical methods; electrical well logging (Dakhnov, translated by Keller)
3 The soils of eastern Colorado: Their origin, distribution and engineering characteristics (Johnstone, Ramarathnam & Richards)
4 Minerals and energy: Problems, practices and goals, Western Resources Conference 1962, Part I (Frush & Lentz)
  Historical pattern of minerals exploitation in Colorado (Koschmann)
  Mineral resources development—the challenge facing Colorado (McNichols)
  Historical pattern of minerals exploitation in the United States (O’Callaghan)
  Mineral resources development—the challenge facing the United States (Sodlard)
  Probable impact of Trade Expansion Act upon domestic mineral industries (Barrie)
  Conceptual perspectives of conservation (Melton)
  Role of technology in the conservation of oil and gas (Hocott)
  Conservation in metal mining (Allsman)
  Coal mining, landscape changes, and reclamation recommendations for Oklahoma (Doerr)
  Upper Snake River Basin, Idaho, Wyoming—surface and underground water (Crandall)
  Recent developments in the conservation of ground water (Callahan)
  National goal for mineral resources: Efficient development and full use (McKelvey)
  Goals and performance standards for the conservation of minerals (Herfindahl)

Volume 58 (1963)

1 Minerals and energy: Problems, practices and goals, Western Resources Conference 1962, Part II, (Frush & Lentz)
  The supply of minor metals (Brooks)
  Future requirements of major metals (Landsberg)
  The role of geochemical research in mineral exploration (Klugman)
  Types of basic research needed in mining (Rinehart)
U.S. minerals problems and goals—the broad picture (Lund)
Needed breakthroughs for ore dressing and metallurgy (Crabtree)
Needed breakthroughs for ore dressing and metallurgy (McGlashan)
Solid-state physics: Character of the interface of solids in contact with aqueous solutions and gases (Gaudin)
Future energy requirements of the United States economy (Nelson)
Future energy requirements: Assumptions and projections (Bickel)
The need for a national fuels policy (Moody)
The strategic stockpile—hindsight and foresight (Netschert)
Research on non-technical factors affecting mineral supply (McDivitt)
The background of Canadian mineral policies (Buck)
Economic and tax problems of mining in Colorado (Lentz & Rusk)
Basic issues in the federal taxation of income from minerals (Steiner)
Some determinants of a mineral policy for the U.S. and Latin America (Wilkinson)
A national mineral policy (Ridge)
Detonation of ammonium nitrate in small drill holes (Maurer)
Pennsylvanian and Permian algae (Johnson)
Eleventh Symposium on Exploration Drilling
Drill bit engineering and new application of drill bits (Pedigo)
A core drilling program in semitaconite (Owens)
Rotary drilling a small diameter shaft in the Carlsbad potash basin (Mooney)
Drill holes as exploration tools for construction purposes (Ogden)
Orientation of small diameter drill core (Zimmer)
Drilling and well-testing problems in investigation of deep aquifers at Nevada Test Site, Mercury, Nevada (Young)
The concept of mineral discovery in the Atomic Age (Sutton)
An improved water-stage recorder for hydraulic drill holes (Koopman)
Drill cutting sampling for oil yields of Green River oil shales (Smith, Trudell & Algermissen)
A discussion of pressure grouting (Graham)
The continuous-core drilling rig in the exploration program (Henderson)
A new approach to bit design—the diamond drag bit (Peters)
Hollow stem augers (Acker)
Evaluating oil shale by log analysis (Bardsley & Algermissen)
Bore hole surveying and directional drilling (Campbell)
Wireline core barrel development (Lindelof)
Air-mist and detergent key to drilling zones of high water volume and lost circulation (Leisek)
The adaptation of controlled mud fluids to diamond core drilling (Williams)
Diamond drilling 12-inch core in permafrost at the Asbestos Project, Quebec (Lawrence)
The mechanism of thermal spalling in rocks (Freeman, Sawdye & Mumpton)
The drill hole magnetometer and its use for magnetic ore-prospecting (Bergdahl)
Drilling research develops low-cost diamond bit (Barrett)

Volume 59 (1964)
1 The application of the reciprocal lattice concept in the graphical solution of x-ray diffraction problems (Schieltz)
2 The Jurassic algae (Johnson)
3 First Symposium on Oil Shale
   Oil from rock—the gas-combustion process (Guthrie)
   Conversion of oil shale to refined products (Carver)
   Retorting oil shale underground—problems and possibilities (Grant)
   Some characteristic properties of Colorado oil shale which may influence in situ processing (Allred)
   Bureau of Mines oil-shale research (Thorne)
   Oil shale development handicapped by government indecision (Aspinall)
   Some oil shale problems—1964 (East)
   Foreign oil shale industries and their influence on United States oil shale development (Cameron)
   Oil shale and the depletion allowance (Tweed)
   Status of unpatented claims (Schmidt)
   Physical background—oil shale (Cooley)
   Geology and oil-shale resources of the Green River Formation (Donnell)
   Surface determination and automatic contouring for mineral exploration, extraction and processing (Batcha & Reese)
   Practical application of critical path method (Hoffman)
   Scientific data processing in mining in Africa (Oxford)
   Operations research and the management process (Pehrson)
   Education of operations research oriented mining engineers (Reed)
   Lockheed Scientific Data Processing System (Taylor)
   Computer applications in geophysical modeling (Galbraith, Simpson & Cantwell)
   Successful computer application by a small exploration consulting firm (Heinrichs et al.)
   Compilation of electrical properties from electrical well logs (Keller)
   Methods of surface trend analysis (Agterberg)
Investigation of geochemical sampling problems by computer simulation (Miesch, Connor & Eicher)
Models in the geochemical study of rock units (Whitten)
The allocation of funds to reconnaissance drilling projects (Celasun)
Simulation of exploration programs for natural resources by models (Griffiths & Drew)
The taxonomy program—a computer technique for classifying geologic data (Howd)
A preliminary model for determining the optimum drilling pattern in locating and evaluating an ore body (Marshall)
Pattern recognition studies of geologic structure using trend-surface analysis (Merriam & Lippert)
Storage and retrieval of analytical data on geologic materials (Lovering & Davidson)
A system of statistical computer programs for geologic research (Miesch & Eicher)
The analysis of regional geologic data for the Front Range Mineral Belt, Colorado (Truebe)
Corporate simulation—theory and application (Davis)
Technical services on mines in Africa (Oxford)
A practical approach to computer utilization in mine planning (Axelson)
A mathematical model of a rotary cement kiln (Weeks)
Chichibu Cement company’s new plant at Kumagaya—Japan is now under real time computer control (Tashiro, Nakagawa & Hasegawa)
A mathematical model of a rotary cement kiln (Weeks)
Models in hydrometallurgy (Woodward)
Computer simulation of comminution circuits (Meloy & Bergstrom)
A brief review of the developments in the application of mathematical statistics to ore valuation in the South African gold mining industry (Krige)
Choosing the optimum cut-off grade (Lane)
Simulation of a mine haulage locomotive (Nelson)
Borehole intercept co-ordinates (Oxford)
Polynomial curve fitting (Oxford)
Application of automatic data processing techniques to uranium ore reserve estimation and analysis (Patterson, de Vergie & Meehan)
Solving mine haulage problems by system simulation (Redmon)
A statistical mine model for cost analysis, planning and decision making (Ruff & Franklin)
Application of a small computer to open-pit planning at the Lucky McUranium Mine (Spielman & Hickman)
The use of computers in heat-flow problems in underground workings (Starfield et al.)
Analysis of shaft and level development, stope production and planning, and ore transportation for a simulated copper mining operation using optimization programming (White & Peiker)
Researches on main haulage underground in main haulage roads (Wilke)

Volume 60 (1965)
1 Electrical prospecting with the telluric current method (Berdichevskiy-translated and edited by Keller)
Volume 98 Number 4

CSM Quarterly Review

12

Volume 62 (1967)

1. Fields about an oscillating magnetic dipole over a two-layer earth, and application to ground and airborne electromagnetic surveys (Frischknecht)
2. Tunnel mechanics (Abel)
3. Fourth Symposium on Oil Shale
   a. The oil shale industry's water problems (Ely)
   b. Impact of dawsonite and nahcolite on Piceance Creek Basin oil shale economics (Heinrich)
   c. Potential resources of dawsonite and nahcolite in the Piceance Creek Basin, northwest Colorado (Hite & Dyni)
   d. Alaskan oil shale (Donnell, Tailleur & Tourtelot)
   e. Fracturing oil shale with electricity (Melton & Cross)
   f. Explosive fracturing tested in oil shale (Miller & Howell)
   g. The characteristics of a low temperature in-situ shale oil (Hill & Dougan)
   h. Shale oil developments: Kinetics of oil shale pyrolysis (Allred)
   i. Conduction heating of oil shale formations (Lesser, Bruce & Stone)
   j. H-oil upgrading of shale oil feeds (Hellwig, Feigelman & Alpert)
   k. Hydrotorting—use of hydrogen for improved recovery of shale oil (Schlinger & Jesse)
   l. Present trends in Estonian-Russian work on oil shale (Cieslewicz)
4. Bibliography of fossil algae, algal limestones, and the geological work of algae, 1956-65 (Johnson)

Volume 63 (1968)

1. Geophysical and geological studies of the relationships between the Denver earthquakes and the Rocky Mountain Arsenal well
   a. Part A (text) and Part B (maps) (Hollister & Weimer)
   b. A seismic study of the Denver (Derby) earthquakes (Major & Simon)
   c. History of earthquakes in Colorado (Hadsell)
   d. Properties of the Rocky Mountain Arsenal disposal reservoir and their relation to Derby earthquakes (Pickett)
   e. Structural geology of the Denver Basin—regional setting of Denver earthquakes (Haun)
   f. Quaternary history of Rocky Mountain Arsenal and environs, Adams County, Colorado (Lickus & LeRoy)
   g. Precambrian structure and stratigraphy along the mountain front west of Golden, Jefferson County, Colorado (Lickus & LeRoy)
   h. Hydraulic characteristics of fractured metamorphic rocks of Front Range and implications to the Rocky Mountain Arsenal well (Snow)
   i. Fracture deformation and change of permeability and storage upon change of fluid pressure (Snow)
   j. Hydrodynamic study of the western Denver Basin, Colorado (Hoeger)

Volume 61 (1966)

1. A review of the Cambrian algae (Johnson)
2. Annotated bibliography on selected mining subjects
3. Third Symposium on Oil Shale
   a. History, present status and contemplated use of naval oil shale reserves (Butterfield)
   b. The oil shale picture from the investment banker's viewpoint (Hildt)
   c. Where is the water coming from? (Moses)
   e. Rock mechanics applied to oil shale mining (Reed)
   f. Mechanization potential in oil shale mining (Breedthauer & Williamson)
   g. Commercial applications of nuclear explosives, the answer to oil shale? (Coffer & Spiess)
   h. Economics of producing oil shale, the nuclear in-situ retorting method (Lekas)
   i. Operating characteristics of a continuous oil shale retort (Farris, Gary & Dickson)
   j. The chemical aspects of distilling Rocky Mountain oil shale in hydrogen at low pressure (Huntington)
   k. Spouted bed oil shale retort (Berti & Gary)
   l. Outlook for the domestic energy market for the next decade (Winger)
4. The petrology and structure of the buried Precambrian basement of Colorado (Edwards)
2 Electrical prospecting for oil (Keller)

3 Cenozoic volcanism in the southern Rocky Mountains (Epis)

4 Fifth Symposium on Oil Shale
   The role of the Public Land Law Review Commission in solving oil shale problems (Mock)
   Economic issues in Federal Oil Shale Leasing Policy alternatives (Mead)
   Design and economics of a sequential flow oil shale retort (Savage, Holt & Sims)
   Wyoming Corehole No. 1—a potential site for production of shale oil in place (Smith & Trudell)
   Application of aboveground retorting variables to situ oil shale processing (Carpenter & Sohns)

A look at situ oil shale retorting methods based on limited heat transfer contact surfaces (Barnes & Ellington)

Availability of water for oil shale development (Balcomb)

A simultaneous caving and surface restoration system for oil shale mining (Allsman)

Shale oil—will it ever be a reality? (Halbouty)

Evolution of underground mining equipment (Allen)

Investigations into the nature of dawsonite in the Green River Formations (Schmidt-Collerus & Hollingshead)

Volume 64 (1969)

1 International Geochemical Exploration Symposium. Proceedings. (Canney, Bloom & Hansuld)

Panel session: What is a geochemical analysis? (Hansuld, Mod.)

Panel session: The education of the exploration geochemist (Bloom, Mod.)

Minor elements as guides to gold in the Roberts Mountains Formation, Carlin Gold Mine, Eureka County, Nevada (Akright, Radtke & Grimes)

Geochemical criteria for assessment of the mineral potential of the igneous rock series during reconnaissance exploration (Beus)

Geochemical mapping of the Horombe Plateau (southern Madagascar) (Borucki & Ratsimbazafy)

Some experiences in heavy mineral prospecting (Brundin)

Geochemical prospecting for lead-zinc stratiform deposits... (Cachau-Herreillat)

Geochemical exploration of the ore-bearing horizons at Zawar Mines, India and its possible bearing on metallogenesis (Chakrabarti)

Suggested guides for exploration from geochemical investigation of ore veins at the Galena Mine Deposits, Shoshone County, Idaho (Chan)

A preliminary examination of trace mercury in rocks, Coeur d’Alene District, Wallace, Idaho (Crosby)

Use of model for relating geochemical prospecting data to geologic attributes of a region, South Mountain, Pennsylvania (Dahlberg)

The modern geochemical laboratory (Debnam)

The use of Radon-222 in surface waters in geochemical prospecting for uranium (Dyck & Smith)

U. S. Geological Survey program in geochemical exploration research (Erickson)

Factor analysis as an aid in the interpretation of regional geochemical stream sediment data (Garrett & Nichol)

Geochemical prospecting for kimberlites (Gregory & Tooms)

Influence of variations in the surface environment on metal distribution in drainage sediments (Horsnail, Nichol & Webb)

Nickel, chromium and cobalt in tropical soils over serpentinites, northwest district, Guyana (Kilpatrick)

Secondary dispersion of mercury from cinnabar and stibnite deposits, West Turkey (Koksoy & Bradshaw)

An orientation study of the uranium distribution in lake waters, Beaverlodge District, Saskatchewan (Macdonald)

Uranium in lake water from the Kaipokok Region, Labrador (Meyer)

Natural organic acids in the transportation, deposition and concentration of gold (Ong & Swanson)

Recent advances in the chromatographic analysis of geologic materials (Ritchie)

The use of geochemistry at the Bald Butte Molybdenite Prospect, Lewis and Clark County, Montana (Rostad)

Trace elements in accessory calcite—a potential exploration tool in the Michigan copper district (Ruotsala, Nordeng & Weege)

Exploration by overburdening drilling at Keno Hill Mines Limited (Van Tassell)

The bearing of tin minerals and ores in the weathering zone and the possibility of geochemical exploration for tin (Varlamoff)

Atomic absorption techniques in geochemical exploration—problem or progress? (Ward & Nakagawa)

2 A rock drillability index (White)

3 Seventh International Symposium on Operations Research and Computer Applications in the Mineral Industries

Criteria for decisions on equipment selection (Brown)

Comparison of a small computer and time-sharing equipment in research (Campbell)

A geochemical discriminant for sandstones of Mississippian and Pennsylvanian age in Kentucky (Connor)

A mine management information system (Cross)
On the use of computers in mining at the LKAB, Sweden (Elbrond)
A mathematical model for pit slope stability (Hammel)
A preliminary model for the economic appraisal of regional resources and exploration based upon geostatistical analysis and computer simulation (Harris & Euresty)
Mineralization pattern prediction and ore deposit evaluation (Hiatt)
An economic evaluation of an ore body (Johnson & Bennett)
Here today: Computing power for every mine (Kaas)
Matrix algebra and the cement mix design problem (Niederjohn)
Financial analysis—Henderson Project (Peiker & Forsythe)
SSDEVOP at Chibougamau (Eggert & Mular)
Magnetite trend surface analysis: A guide for open pit quality production control at the Smallwood Mine, Newfoundland (Harris & Zodrow)
Interpolation of areally distributed data (Agterberg)
Optimization of open pit traffic patterns (Duckstein)
Maintenance scheduling of stochastically failing mine face equipment (Mutmansky & Manula)
Oil rocks: information theory: Markov Chains: entropy (Dowds)
Alaska’s base and precious metals resources: A probabilistic regional appraisal (Harris)
A computer program for the design of open pits (Fairfield & Leigh)
Stochastic exploration (Brown)
Improving the performance of minerals beneficiation plants (Putman)
Network analysis applied to mine ventilation (Clementson)
The ARL surface fitting—contouring program (Chun, Schlater & Kachik)
4 The political economy of energy and national security. Rocky Mountain Petroleum Economics Institute. (Hanke)
Role for oil and gas in national security: A government view (Mathews)
The role for oil and gas in national security: An industry view (Jameson)
A consumer’s view on the role for oil and gas in national security (Shea)
Without rudder, compass, or chart—the problem of energy policy guidelines (Gordon)
The role for oil and gas in national security (Stabback)
Some dimensions of Middle East oil: The producers and the United States (El Mallakh)
Role of oil and gas in national security: A view from Venezuela (Gurfinkel)
Problems of assuring petroleum for national security (Gonzalez)
Potential role of unconventional energy sources in national security, 1969-1985 (Schanz)
The potential roles of Canadian oil and gas, other Western Hemisphere oil and Eastern Hemisphere oil in United States Markets, 1965-1985 (Lipton & Kilgore)
Conservation policies and national security (McDonald)
Oil import policies as they relate to national security (Lovejoy)
Federal public lands leasing policies (Mead)

Volume 65 (1970)
1 Stratigraphy and petroleum occurrence, Green River Formation, Red Wash field, Utah (Koesoemadinata)
2 Gyroscopic surveying (Lauf)
3 State and federal regulations pertaining to the petroleum industry (Bass)
4 Synthetic liquid fuels from oil shale, tar sands, and coal. Proceedings of the Hydrocarbon Symposium (Gary)
The outlook for synthetic liquid hydrocarbons, a contemporary view (Schanz)
The international synthetic fuels picture (Cameron & Dailey)
Preliminary design and operation of a 150-ton oil shale retort (Harak, Long, & Carpenter)
The potential for in situ retorting of oil shale in the Piceance Creek Basin of northwestern Colorado (Dougan, Reynolds & Root)
Resource appraisal of three rich oil-shale zones in the Green River Formation, Piceance Creek Basin, Colorado (Donnell & Blair)
Disposal of oil shale ash (Culbertson, Nevens & Hollingshead)
Thermal analysis of oil shales (Cook)
The retorting of coal, oil shale and tar sand by means of circulated fine-grained heat carriers as a preliminary stage in the production of synthetic crude oil (Rammler)
Coal liquefaction—a progress report (Rice)
A synthetic fuels industry based on Rocky Mountain coals (Eddinger, Strom & Bloom)
Liquifaction of some western coals (Wood, Anderson & Hill)
Some solutions for future gas supply (Sampson)
Alberta’s synthetic crude oil development policy (Govier)

Volume 66 (1971)
1 Selected topics of recent Estonian-Russian oil-shale research and development (Cieslewicz)
2 An introduction to the study of organic limestones, revised edition (Johnson)
3 Geologic history of South Park and geology of the Antero Reservoir quadrangle, Colorado (DeVoto)
4 Brannerite: Its occurrences and recognition by microprobe (Ferris & Ruud)
Volume 67 (1972)
1 Rock-burst mechanics (Blake)
2 Stratigraphy of Fox Hills sandstone and associated formations, Rock Springs uplift and Wamsutter Arch area, Sweetwater County, Wyoming: A shoreline-estuary sandstone model for the Late Cretaceous (Land)
3 Upper Cenozoic calcareous nanofossils from the Gulf of Mexico (Deep Sea Drilling Project, Leg 1, Site 3) (Ellis, Lohman & Wray)
4 Paleozoic stratigraphy and structural evolution of Colorado. A symposium. (DeVoto)
Canadian depositional environments and paleotectonics, central Colorado (Gerhard)
Lower Paleozoic systems, White River Plateau (Campbell)
Middle Paleozoic kimberlitic diatremes in Colorado and Wyoming (Chronic)
Mississippian stratigraphy of central Colorado (Nadeau)
Depositional and diagenetic history of the Mississippian Leadville Formation, White River Plateau, Colorado (Conley)
Pre-Pennsylvanian paleotectonic framework of Ancestral Rockies of Colorado (abstract) (Baars)
Pennsylvanian and Permian stratigraphy and tectonism in central Colorado (De Voto)
Permo-Pennsylvanian stratigraphy and history of the Crested Butte-Aspen region (Bartleson)
Biotherms in the Minturn Formation (Des Moinesian Age), Vail-Minturn area, Eagle County, Colorado (Walker)
Pennsylvanian-Pennsylvanian stratigraphy and structural evolution of the Breckenridge-Shrine Pass area (abstract) (Taranik)
Permo-Pennsylvanian stratigraphy and history of the Howard area, central Colorado (abstract) (Pierce)
Pennsylvania and Permian stratigraphy and structural history, northern Sangre de Cristo Range, Colorado (De Voto & Peel)
Volume 68 (1973)
1 Quantitative mineral exploration (Groff)
Which way the mining industry? (Groff)
Techniques for use in determinative mineralogy at Newmont Exploration Limited (Odekirk)
Quantitative mineralogy by the microscopic technique and select uses of the electron microprobe by Newmont Exploration Limited (Ahlrichs)
Application of the computer for solution of geophysical problems in mineral exploration (Fuller)
Application to quantitative mineralogy by x-ray diffraction to problems in mineral exploration (Hausen)
Dispersive and non-dispersive x-ray fluorescence analysis of ore samples with computer applications (Crozier)
Quantitative mineralogical estimates via the use of linear programming (Frush)
2 Future energy outlook (Pederson)
Mining and minerals policy (Browning & Davis)
The Mining and Minerals Policy Act of 1970, and subsequent, congressional, implemental acts (Osborn)
Industry’s expectations as to a national mining and minerals policy (Samson & Heston)
Efficient exploration and development of fuels and energy group of mineral resources (Curry & Conselman)
Exploration and development of petroleum resources, 1970-1975 (Crandall)
Exploration and development of natural gas resources, 1970-1975 (Hardin)
Exploration and development of uranium resources, 1970-1975 (Bunker)
Exploration and development of coal resources, 1970-1975 (Risser)
Exploration and development of oil and oil-impregnated rocks, 1970-1975 (Ritzma)
Interfuel competition for future energy markets (Gonzales)
Petroleum outlook (Galloway)
Outlook for natural gas in the United States (Loftis)
Outlook for coal (Corcoran)
Outlook for oil shale (Cameron)
Outlook for tar sands and other bitumens (Spragins)
Outlook for nuclear fuels (Hardin)
Outlook for geothermal energy (McNitt)
Project Gasbuggy: Fracturing with nuclear explosive (Gevertz)
3 Geology for planning: A review of environmental geology (Turner & Coffman)
4 International economics of minerals and fuels (Petrick)
World supply, demand and finance of minerals and fuels development (Petrick & Joves)
The new service contract policy for petroleum development in Venezuela (Tovar N.)
New economy for Ecuador: Texaco and Gulf strike oil (Davalos)
The new general mining law in Peru and the creation of the “Peruvian Mining Community“ (Leon V.)
The economic potential of tungsten in northeast Brazil (Barbosa)
The economics of bauxite-alumina-aluminum in western Columbia (Velasquez)
The politics of expropriation, Chilean style (MacDonnell)
The financial effect of Chilean expropriation on the Anaconda Copper Company (Natta)
The mineral policy of selected foreign nations on direct foreign investment in the mineral industry (Bennett)
Volume 69 (1974)
1. Studies in metallurgical engineering: Flotation kinetics, electroslag welding
   A study of mixing patterns in a bank of flotation cells (Bull & Spottiswood)
   On the determination of rate constants from semibatch flotation tests (Ball & Fuerstenau)
   Metallurgical aspects of electroslag welding: A review (Liby & Olson)
2. Proceedings of the Seventh Oil Shale Symposium (Gary)
3. Gold placers of Colorado (Book 1 of 2 Books) (Parker)
4. Gold placers of Colorado (Book 2 of 2 Books) (Parker)
Supp. A
   Index to the publications of Colorado School of Mines 1953-1973 (Howbert)

Volume 70 (1975)
1. Geochemical studies in Venezuela
   Study of the weathering of basic, intermediate, and acidic rocks under tropical humid conditions (Lopez-Eyzaguirre & Bisque)
   Stratigraphy of the diamond-bearing Roraima Group, Estado Bolivar, Venezuela (Reid & Bisque)
   Interpretation of soil geochemical expression of mineralization within El Callao Gold Mining District (Pasquali Z. & Bisque)
2. Mineral economics of energy development
   Petroleum finding costs in United States (DaBai)
   Impact of energy supply policies in Colorado; summary report (Hebb)
   Economic impact of alternative energy supply policies in Colorado: A summary report (Hebb) (Published separately but shown as Volume 70, #2 on the cover)
3. Proceedings of the Eighth Oil Shale Symposium (Gary)
4. Proceedings of the Environmental Oil Shale Symposium (Gary)

Volume 71 (1976)
2. Public policy for hard-rock minerals access on federal lands: A legal-economic analysis (MacDonnell)
3. Geology and geochemistry of Sierra Madre Range, Wyoming (Divis)
4. Proceedings of the Ninth Oil Shale Symposium (Gary)

Volume 72 (1977)
1. Statistical analysis in geology: Correspondence analysis method (David, Dagbert & Beauchemin)
2. Effects of state taxation on mining industry in Rocky Mountain states (Laing)

Volume 73 (1978)
1. Some earth resistivity problems involving buried cables (Wait)
2. Quaternary geology and reported surface faulting along east flank of Gore Range, Summit County, Colorado (West)
3. Studies of a geothermal system in northwestern Nevada, Part 1 (Keller & Grose)
4. Studies of a geothermal system in northwestern Nevada, Part 2 (Keller & Grose)

Volume 74 (1979)
1. Estimation of minimum specifications for economically explorable sandstone-type uranium deposits (Ellis)
2. Principles of rock drilling (Clark)
3. Modes of uranium occurrences in Colorado Front Range (Carpenter, Gallagher & Huber)
4. Plant sociology of alpine tundra, Trail Ridge, Rocky Mountain National Park, Colorado (Willard)

Volume 75 (1980)
1. Industrial high explosives: Composition and calculations for engineers (Clark)
2. Stratigraphy and uranium deposits, Lisbon Valley District, San Juan County, Utah (Huber)
3. Mineral severance taxes in western states: Economic, legal, and policy considerations (Blackstone)
4. Analysis of bulk flow of materials under gravity caving process, Part 1: Sublevel caving in relation to flow in bins and bunkers (Yenge)

Volume 76 (1981)
1. Basic properties of ammonium nitrate fuel oil explosives (ANFO) (Clark)
2. Tectonics, sedimentation, and petroleum potential, northern Denver Basin, Colorado, Wyoming, and Nebraska (Sonnenberg & Weimer)
3. Analysis of bulk flow of materials under gravity caving process, Part 2: Theoretical and physical modeling of gravity flow of broken rock (Yenge)
4. Geotechnical centrifuges for model studies and physical property testing of rock and rock structures (Clark)

Volume 77 (1982)
1. Principles of rock drilling and bit wear (Part 1 of 2 Parts) (Clark)
2. Principles of rock drilling and bit wear (Part 2 of 2 Parts) (Clark)
3 Quaternary geology and neotectonics of the west flank of the northern Sangre de Cristo mountains, south-central Colorado (McCalpin)
4 Tectonic influences on sedimentation, Early Cretaceous, east flank Powder River Basin, Wyoming and South Dakota (Weimer et al.)

Volume 78 (1983)
1 An economic feasibility study for a geothermal-coal hybrid power plant in Chaffee County, Colorado (Parker & Maurer)
2 Algal limestones within the Minturn formation, Meeker to Dotsero Area, western Colorado (Irtem)
3 Research in chemistry and geochemistry at Colorado School of Mines: A tribute to L. J. Beckham, Part 1 (MacCarthy)
4 Research in chemistry and geochemistry at Colorado School of Mines: A tribute to L. J. Beckham, Part 2 (MacCarthy)

Volume 79 (1984)
1 Physical modeling of the draw behavior of broken rock in caving (Peters)
2 Seismic waves: Anisotropy, fluid saturation, and slanting interfaces (White, Harmsen & Harding)
3 Depositional environments, diagenetic history, and petroleum entrapment in the Mississippian Frobisher-Alida Interval, Billings Anticline, North Dakota (Kupecz)
4 Capital and operating cost estimation for milling of uranium ores in United States (Kuestermeyer)

Volume 80 (1985)
1 Cenozoic evolution of the northwestern Honey Lake Basin, Lassen County, California (Roberts)
2 Stratigraphy and petroleum potential of Trout Creek and Twentymile sandstones (Upper Cretaceous), Sand Wash Basin, Colorado (Siepman)
3 Carbonate depositional environments modern and ancient, Part 1: Reefs-zonation, depositional facies, and diagenesis (James and MacIntyre) (Series edited by Warme & Shanley)
4 Carbonate depositional environments modern and ancient, Part 2: Carbonate platforms (Harris, Moore & Wilson)

Volume 81 (1986)
1 Carbonate depositional environments modern and ancient, Part 3: Tidal flats (Hardie & Shinn)
2 Carbonate depositional environments modern and ancient, Part 4: Periplatform carbonates (Mullins)
3 Pillar stability in large underground openings: Applications from a case study in competent, jointed rock (Agapito)
4 Carbonate depositional environments modern and ancient, Part 5: Diagenesis (Bathurst & Land)

Volume 82 (1987)
1 Carbonate depositional environments modern and ancient, Part 6: Diagenesis 2 (Halley & Matthews)
2 Buried treasure to buried waste: The rise and fall of the radium industry (Landa)
3 Geochemical ecology of microorganisms (Letunova & Kovalsky)
4 Cenozoic volcanism in the southern Rocky Mountains revisited: A tribute to Rudy C. Epis, Part 1 (Drexler & Larson)

Volume 83 (1988)
1 Cenozoic volcanism in the southern Rocky Mountains revisited: A tribute to Rudy C. Epis, Part 2 (Drexler & Larson)
2 Cenozoic volcanism in the southern Rocky Mountains revisited: A tribute to Rudy C. Epis, Part 3 (Drexler & Larson)
3 Ground response to longwall mining: A case study of two-entry yield pillar evolution in weak rock (Malecki)
4 24th Oil Shale Symposium proceedings (Gary)

(Publication ceased from 1989 through 1991. Publication resumed in 1992 with a numbering system that links the volume number with the last two digits of the publication year.)

Volume 92 (1992)
1 Ore deposits and exploration potential of the former Soviet Union
2 Ore deposits and exploration potential of the former Soviet Union
3 Ore deposits and exploration potential of the former Soviet Union
4 Ore deposits and exploration potential of the former Soviet Union
Education and the mineral industry: A profitable partnership (Baughman)
Some technological solutions of environment optimization in mining regions of the Far North (Mesyats, Melnikov & Kalatakaya)
Ore deposits and exploration potential of the former Soviet Union: Proceedings of a symposium at Colorado School of Mines (Emso & Sweetkind)
Plate tectonics and ore deposits within North Eurasia (Zonenshain, Kuzmin & Nepatov)
Mineral deposits in the north east of Russia (Ob’edineie)
Geology of the I-70 road cut (LeRoy)
Dinosaurs near Denver (Lockley)

3 Yucca Mountain, Nevada
Storage of hazardous wastes underground (Aughenbaugh)
Underground exploration at Yucca Mountain, Nevada (Gertz & Christy)
Geologic framework and Cenozoic evolution of the Yucca Mountain area, Nevada (Fox, Spengler & Myers)
Elaboration of complex methods for reduction of oil pollution of surficial waters (Mesyats, Kirillova & Sentyabreva)
Committing to quality and continual improvement (Boscé & Sharp)
Analysis of a boom/bust cycle: How severe was the oil shale bust in northwest Colorado? (Evans)
Technical and economic framework for market enhancement of shale oil (Bunger & Devineni)
Ore deposits of the Central City-Idaho Springs area (Sims)
New research at Colorado School of Mines (Reed et al.)

4 Towards a coherent U.S. technology policy
Towards a coherent technology policy in the U.S. (Bloch)
The crisis in American public education (Tafoya)
Groundwater modeling: A vital tool for water resource management (Mark)
AGTS tunnel at the new Denver International Airport (Michelutti et al.)
Engineering geology of Glenwood Canyon (Bowen)
Hanging Lake Tunnel (Ueblacker)
Hydrogeology and phytogeomorphology of the mountains and foothills near Denver, Colorado (Emerick & Kolm)
Geology and mineral resources of central Colorado (Reed et al.)

Volume 93 (1993)
1 Groundwater modeling
Groundwater modeling: A vital tool for water resource management, Part II (Mark)
Geology and mineral resources of central Colorado, introduction (Reed, Bryant & Sims)
The onset of the Laramide Orogeny (Bryant)

Volume 94 (1994)
1 Earthquakes in Colorado
History of earthquake activity in Colorado (Hadsell)
Denver earthquakes and the Rocky Mountain Arsenal well (Hollister & Weimer)
A seismic study of the Denver (Derby) earthquakes (Major & Simon)
Water pollution in Colorado (Pings)
2 Geology and flowers of Red Rocks Park
Geology and flowers of Red Rocks Park (L. W. LeRoy & D. A. LeRoy)
The quest for gold and silver (Strauss)
3 Russia’s nuclear waste
Education, a partnering effort (Barber)
Nuclear waste repository program in Russia (Melnikov, Sharp & Ozdemir)
Conceptual design of a futuristic large rock cavern (Vandergrift & Oudenhoven)
Microtunneling used for record-breaking pipe roofing project (Coller & Abbott)
“De Re Metallica,” a timeless classic (Tafoya)
4 Placer mining
Basic geologic guidelines in placer mining (LeRoy & Hutchinson)
Numerical modeling and the Fountain Creek, Colorado alluvial aquifer system to assess the impact of wastewater treatment plant effluent (Wadsworth et al.)
Report of the Potential Gas Committee: Rocky Mountains (Rochester et al.)
Japan: “Send in the volunteers” (Suematsu)

Volume 95 (1995)
1 Colorado’s competitive edge
Colorado’s competitive innovation edge (Peterson)
Sustainable human existence (Bosché & Sharp)
Radium in Colorado (Landa)
Geologic history of South Park, Colorado (DeVoto)
2 The evolution of corporate management
The evolution of corporate management: An interview with Tom Hamilton, President, Pennzoil Company (Tafoya)
Petroleum resources of Pakistan (Kadri)
Environmental management and ecology in India (Bhar)
The Australian Mines Rescue Organization (Strang & MacKenzie-Wood)
Operations research at Colorado School of Mines (Tafoya)
Some facts about global climate change (PETC Publications)
Discovery of water ice nearly everywhere in the solar system (Zuppero)
3 Our other atomic legacy
Our other atomic legacy (Morse)
Uranium occurrences in the Front Range (Carpenter, Gallagher & Huber)
Contributions of the oil and gas industry to cultural heritage management (Atheyrn)
Historical timeline for Colorado hydrocarbons (Oldaker)
4 (Issue withdrawn)

Volume 96 (1996)
1 The rise and fall of the radium industry (Landa)
2 Geological history of the Front Range (Carpenter, Gallagher & Huber)
3 Partnerships for solutions (Sacks & McKay)
(Replacement for Volume 1995, #4)
Bench and pilot-scale treatment of low-level mixed waste using supercritical carbon dioxide extraction (Brown & Teter)
Polymer encapsulation of low-level mixed waste and debris at the Rocky Flats Environmental Technology Site (Faucette)
The U.S.-Belarus joint projects associated with remediation of the Chernobyl contaminated sites (Grebenkov & McCarn)
Application of microwave solidification technology to radioactive waste (Harris et al.)
Environmental restoration activities in Russia: An attempt of an independent evaluation (Nechaev & Projaev)
Off-gas treatability studies for high temperature rad waste treatment facilities (Nechaev et al.)
Decontamination and decommissioning activities at the A-1 Bohunice Nuclear Power Plant (Subna & Sezak)
Coping with the aftermath of the Chernobyl Nuclear Power Plant accident (Tokarevsky) (summarized by McKay)
Fluidized bed unit combustion at the Rocky Flats Environmental Technology Site (Wade)
Appendix: A view of the Russian government (Danilov-Danilian) (summarized by J. Miller)
4 Visions for the future
Directions for chemical engineering education (Baldwin)
One person’s vision for applied geophysics—1985 to 2005 (Romig)
Past, present and future of the Department of Metallurgical and Materials Engineering at CSM (Moore)
W. J. Kroll: “A metallurgist of the unusual; the amphibious and recalcitrant lone wolf researcher” (Moore)
A different approach to teaching humanities at CSM, an editorial (Woolsey)

Volume 97 (1997)
1 Visions for the future, Part II
Rapid changes in the Division of Engineering (Gosink)
Department of Chemistry and Geochemistry: A vision statement (Daniel)
Student Life Division: A vision statement (Cheuvront)
Commercial applications of combustion: A vision for the Colorado School of Mines in space (Schowengerdt)
Mobile robotics at CSM: Reinventing a failed technology (Murphy)
2 Environmental transforms
“Environmental Transforms:” The Hennebach Lectures for 1996-97 (Gillmor)
Tradition and transformation in classical science
The scientific revolution: The “Classical” and
“Baconian” sciences
Transforming growth in science and engineering
International cooperation, the International
Geophysical Year (IGY), and building an
environmental science for the 21st century
In summary
3 Stewardship and sustainability
A century of success: Reflections on the past and
a vision for the future of women at Colorado
School of Mines (Tichenor)
Toward earth stewardship and sustainability:
Liberal Arts and International Studies at CSM
(Sacks)
The McBride Honors Program: Educating the
compleat engineer (Olds)
CSM Admissions: Past, present, future (Young)
4 Visions for the future: Conclusion
Visions for the future of CSM’s Petroleum
Engineering Department (Van Kirk)
The past, present, and future of the Physics
Department (Williamson)
An unedited account of the Mining Engineering
Department and mining engineering
profession in the future (Rozgonyi)

Volume 98 (1998)
1 Going global: The Quarterly shifts focus
To our readers: The Quarterly inaugurates a new
editorial policy
Globalization, transnationality of markets and
CSM: Whither globalization and
engineering education (E. Pang)
The importance of educating a “global engineer”
(L. Pang)
CSM Admissions: Past, present and future
(Woolsey)
2 The Hennebach Lectures 1997-98: Rethinking
engineering education and technological
development (Vanderburg)
Sustainable development: Can we engineers have
our cake and eat it too?
Environmental sustainability: How we can all be
winners
Human sustainability: Regaining control
Cultural factors: Is our faith in technology
misplaced?
The stakes of the twenty-first century
I too have a dream: Implications for CSM
3 Emerging markets and political risk
Part 1: The international political economy of the
financial crisis in Asia-Pacific and
Latin America, 1997-98
Part 2: The interconnectivity of international
political economy forces in assessing
risk
4 Index to the CSM Quarterly, Volume 1 through
Volume 98
