## ***Petroleum Technology Transfer Council (PTTC)***

The Petroleum Technology Transfer Council (PTTC) identifies priority technical problems of independent oil and gas producers; transfer upstream environmental and protection technologies to help domestic producers reduce costs, improve operating efficiency, increase ultimate recovery, enhance environmental compliance, and add new oil and gas reserves.

### ***Background:***

- Established in 1994 at the national level; Rockies Region at CSM established in 1995
- Formed to assist domestic independent oil & gas producers

### ***Areas of Expertise:***

- Oil & gas exploration and production
- Oil & gas technologies, including computing technologies

### ***Sponsoring Organizations:***

- U. S. Department of Energy
- State governments
- Industry

### ***Method of Technology Transfer:***

- Workshops and seminars
- Electronic information exchange, such as  
→ PTTC National and Rocky Mountain homepage: <http://www.pttc.org/> or <http://www.mines.edu/research/PTTC/>
- Telephone referrals
- Computer resource center
- Quarterly Newsletter

### ***Spin-offs / Contributions:***

- Promote discussions and interactions
- Technology transfer
- Technology knowledge and needs of oil and gas industry
- Visibility for CSM
- Large software inventory available to CSM students for research courses
- Student employment
- Free or low -cost enrollment in workshops for CSM students
