M. King Hubbert Center for Petroleum Supply Studies

The M. King Hubbert Center for Petroleum Supply Studies is named after the father of petroleum studies, M. King Hubbert. The Center was established as a non-profit organization by Mr. L.F. Ivanhoe for the purpose of assembling, studying, and disseminating data concerning global petroleum supplies. The Center's quarterly newsletter has a national and international distribution to more than 1,000 individuals and organizations.

Background:

- Established in 1996
- CSM campus information center
-
- Areas of Expertise:
- Global petroleum supply
- Petroleum engineering
- Production forecasting

Sponsoring Organizations:

- Established by grant from L. F. (Buzz) Ivanhoe
-

Method of Technology Transfer:

- Information Center
- Newsletters
- ***Web Site: <http://hubbert.mines.edu>***

Spin-offs / Contributions:

- Promote public awareness of petroleum supply issues
- Petroleum reserve estimates
- Recovery efficiencies
- Archive of selected experts' work files
