

Mid-semester Feedback Form
S. Pankavich – MATH484 – Spring 2015

This form is meant to provide feedback to me regarding the course thus far. It is neither an evaluation nor a document required by the Department of Applied Mathematics and Statistics or the Colorado School of Mines. I routinely do this because I care about both your education and your opinions, especially with regards to my class. My only request is that you answer honestly and truthfully. All responses are 100% anonymous and have no bearing whatsoever on your grade or performance within the course. Please use the back of the sheet if necessary.

1. How is the presentation of the material so far? This includes clarity of explanation, organization, preparation, and effective use of class time.

2. How has the administration and feedback been? Please include any comments regarding useful, timely, and fair feedback of grading, as well as, availability for answering emails or office hours.

3. Overall how has the course been? If other students asked you if they should take this course or another course from me, would you recommend they do so? Why or why not?

4. On average, how much time do you devote to this course outside of class meetings (including homework, reading, studying, etc) per week?

5. Are you learning? Do you enjoy what you are learning? Do you find it interesting? Do you think it may be useful to you in the future?
