SYGN501 – Research Skills for Graduate Students
Roel Snieder

This 1-credit class teaches practical skills for doing research

• choosing a project
• making a work-plan
• working with your advisor
• publishing papers
• oral communication
• writing proposals
• time management
• the scientific career
• applying for a job

Roel Snieder is a Fellow of the American Geophysical Union (2000), he received the Excellence in Research Award of the Colorado School of Mines (2011), the Gutenberg Medal of the European Geophysical Union (2014), and the Outstanding Educator Award of the SEG (2014).

“Overall an excellent class, I learned a lot of things that will carry into my future research. Roel is a fountain of advice.”

"I think you are giving us all the sorts of counselling that you typically don't receive from an advisor."

SYGN501, Wednesday 3-4 PM, AH162
