Literature Searches

• To learn about basic, well understood ideas
  – Textbooks are ideal if you can find them
  – Search for “tutorial” or “survey” papers

• Start by searching the internet
  – Often researchers will put their latest projects and papers on their websites
  – You can get ideas of what to search for next
  – However, giving a citation to a website is not acceptable; it must be a book, journal or conference

• To find specific papers
  – CSM has electronic subscription to many journals, including all the IEEE journals. Go to the library website (you must be on campus or using vpn to log in)
  – Often Google Scholar will find it somewhere on the web
  – I have a subscription to the IEEE Computer Society Digital Library (http://www.computer.org/portal/web/csdI) which has many conference papers
  – http://citeseer.ist.psu.edu/ is also pretty good
