Lab 11
April 11, 2016

NAME ________________________   NAME ________________________

This lab assignment should be done in teams of two. Go through the exercises below and show me your results. If you don’t finish by the end of today’s class, you may show me during the next class.

1. Measure the frame rate of the program “main_v1”, which finds interest points in each image.

2. Measure the frame rate of the program “main_v2”, which finds interest points and tracks them from image to image. It finds additional points only when necessary.

3. Modify the program “main_v4” to add and track new points. Show the instructor your results.
