

# **Fritz Joseph Ursell**

## **Bibliography**

## Fritz Joseph Ursell. Bibliography

Most of Ursell's papers were collected and published in two volumes as *Ship hydrodynamics, water waves and asymptotics: collected papers of F. Ursell, 1946–1992* (World Scientific, Singapore, 1994). He divided the papers into four sections:

- A. Ship hydrodynamics and linear theory of water waves
- B. Aerodynamics and acoustics
- C. Mathematical methods
- D. Oceanography

The papers of section A are in volume I, the remainder are in volume II. In the following list of publications, we identify those in the *Collected Papers* by, for example, A1 at the end of reference [4].

- [1] F. Ursell, Analysis of sea waves. Admiralty Research Laboratory, Teddington, Report ARL 103.30/R1/W, 1945. Catalogued as ADM 204/2117 in The National Archives.
- [2] N. F. Barber, F. Ursell, J. Darbyshire and M. J. Tucker, A frequency analyser used in the study of ocean waves. *Nature* **158** (1946) 329–332. doi D1
- [3] F. Ursell, The wave-making properties of a submerged pulsating source. Admiralty Research Laboratory, Teddington, Report ARL 103.41/R3, 1946. Catalogued as ADM 204/2107 in The National Archives.
- [4] F. Ursell, The effect of a fixed vertical barrier on surface waves in deep water. *Proc. Camb. Phil. Soc.* **43** (1947) 374–382. doi A1
- [5] F. Ursell, The reflection of waves from a submerged low reef. Admiralty Research Laboratory, Teddington, Report ARL/R5/103.41/W, 1947. Catalogued as ADM 204/2109 in The National Archives.
- [6] N. Barber and F. Ursell, Study of ocean swell. *Nature* **159** (1947) 205. doi
- [7] N. F. Barber and F. Ursell, The generation and propagation of ocean waves and swell. I. Wave periods and velocities. *Phil. Trans. R. Soc. A* **240** (1948) 527–560. doi D2
