

Griffiths Elected to UC Berkeley Academy of Distinguished Alumni

Department of Civil and Environmental Engineering (CEE) Professor **D. Vaughan Griffiths** has been elected to the University of California, Berkeley's CEE Academy of Distinguished Alumni for the class of 2023.

The Academy was established to recognize the outstanding professional achievements and contributions of Berkeley's CEE alumni.

Professor Griffiths received his bachelor's and doctoral degrees in Civil Engineering and Numerical Methods in Geomechanics from the University of Manchester, UK and his master's degree from the University of California at Berkeley. Griffiths is currently the Associate Department Head of Civil and Environmental Engineering at the Colorado School of Mines. He principally works on finite element analysis and risk assessment methods for civil infrastructure, with a focus on geotechnical engineering.
